

MATH BOARD GAME

Description

The activity is tailored for seniors, to improve math skills through playing board game.

Learning Objectives

- Develop basic math skills through basic mathematical calculations.
- Enhance creativity and positive emotions.

Time Needed

20 – 30 min.

Learning Setting

Individual or group activity

Materials Required

Printed Board game; Dice;
Coin/figure; Calculator (optional)

Practical Tips

Can be played multiple times. The numbers of mathematical calculations can be adjusted for more variations to make it more difficult or easier.

Step By Step Guidance

1. Roll the dice then move a figure according to the number on the dice and solve the math problem.
2. If your answer is correct stay on that space, if your answer is incorrect move back to your previous space.
3. It can be played by 2-4 persons.
4. First player to the finish wins.

Expected Results

- Improved math skills, including basic calculations;
- Improved creativity and emotional wellbeing.
